MSRP: \$525

Let's  
**face it**

You're going to ride these wheels until they die. Fortunately, that's going to take a while. And when the end finally comes, they're fully rebuildable with off-the-shelf, non-proprietary rims and spokes. In the meantime, enjoy their unmatched combination of strength, durability, light weight, and value.

And don't forget to look good while you're doing it.
